iPECS PCI

SAFE & SECURE CARD PAYMENTS

Safe, secure card payments for all businesses

PCI compliance powered by iPECS Cloud

PCI compliance for phone-based card payments

How does iPECS PCI benefit your business?

LOCAL BUSINESS OWNER

"I just didn't think PCI applied to me – it's only for the 'big boys' right? Wrong. When I looked into PCI and realised how my business could be impacted if I am not compliant I looked into my options. iPECS PCI is so easy and affordable. And because the Service Provider is Tier 1 compliant it means there is less admin and red tape for me."

CUSTOMER SERVICE AGENT

"iPECS PCI is so easy and intuitive to use. From securing the line with the customer to the web-based payment portal, taking payments over the phone is a breeze for me and my customers."

COMPLIANCE MANAGER

"Managing our PCI compliance can be a headache. Implementing iPECS PCI from a Tier 1 certified Service Provider removes so many of those headaches and it means our business can focus on our customers and when have peace of mind when we do need to take payments."

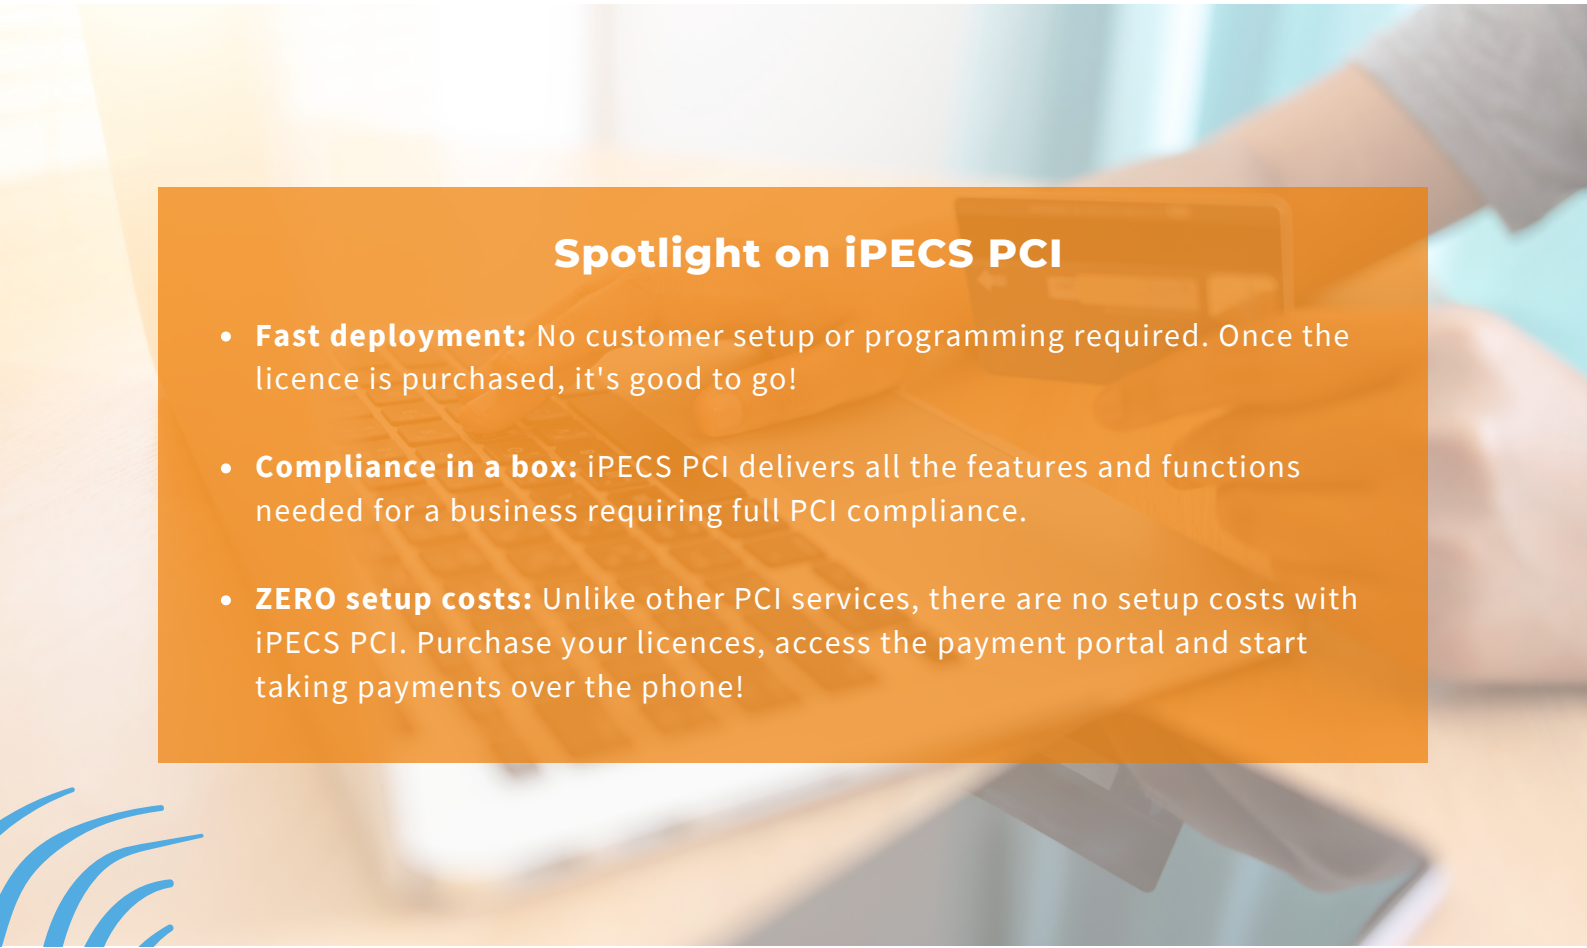
CUSTOMER

"My first experience of this service was so simple. The agent secured the line and I just entered my card details from my phone. It's always a worry when you are reading out card information over the phone. Once the agent explained how the payment would be taken it really put my mind at ease and the whole process was so quick and easy."

iPECS PCI is a service that ensures customers can take card payments over the phone without the worry that they may be in breach of PCI regulations and putting their customer's card details at risk. From the smallest online business or local take-away to the largest insurance providers, PCI applies to all businesses who may be taking payments over the phone. iPECS PCI ensures that your iPECS Cloud voice service meets the PCI regulations from day 1.

What will iPECS PCI do for you?

- Staff can quickly and easily take card payments over the phone in the knowledge that your service is secure and complies with all PCI regulations.
- There is no risk of potential fines or misplaced customer data. All customer card details are hidden from staff who are taking payments over the phone.
- As an ongoing, low monthly charge, there are no OPEX implications with often costly upfront charges running into £1000's just to set a PCI service up. iPECS PCI is based on the number of SIP channels consumed by your business and there are no upfront charges meaning that you have a manageable and predictable monthly expenditure.
- Deploying iPECS PCI will help to alleviate the cost and headaches around maintaining PCI compliance with your business. As iPECS PCI is provided by a Tier-1 PCI accredited Service Provider, the annual requirements mean that businesses only need complete the SAQ-A self-assessment. That's only 22 questions that need to be answered versus 386 that are required with the SAQ-D self assessment.



Spotlight on iPECS PCI

- **Fast deployment:** No customer setup or programming required. Once the licence is purchased, it's good to go!
- **Compliance in a box:** iPECS PCI delivers all the features and functions needed for a business requiring full PCI compliance.
- **ZERO setup costs:** Unlike other PCI services, there are no setup costs with iPECS PCI. Purchase your licences, access the payment portal and start taking payments over the phone!

Benefits Overview

Cost Savings

With a much reduced requirement around self-assessment, businesses can dramatically reduce the costs associated to maintain PCI compliance.

Safe & Secure

Run your business and interact with your customers, safe in the mind that any card transactions you make are secure, customer details are safe and that your business is compliant.

Predictable Costs

As a static, monthly cost, iPECS PCI ensures that you will not get any unwanted surprises.

Easy to Use

Staff will not require lengthy training. iPECS PCI is intuitive and simple meaning that users are up and running in minutes, saving time and money for your business.
